

Lev-lok® Modular Wiring Device System

A complete portfolio of devices, including receptacles, switches, sensors and USBs, designed to meet the challenges of large construction projects as well as current and future building requirements.

Competitive Comparison

BRANDS ► FEATURES ▼	Leviton Lev-Lok®	Hubbell SNAPConnect®	Legrand/P&S PlugTail®	Cooper/Arrow Hart ArrowLink®	Leviton ADVANTAGE
Module Solution	Rotating Lock	Push-In	Push-In	2-Module Push-In	The simple push and twist action on Lev-lok devices securely fastens the wiring module, providing a reliable, safe connection. Competitors with push-in solutions are extremely difficult to unplug.
Mechanical Module Connection	Solid brass pins on back	Thin strips of metal	Thin strips of metal	Thin strips of metal	The solid brass pins on Lev-lok provide better surface area and a more robust connection.
Strap	ALL Lev-Lok devices feature a wraparound strap	Through strap	A limited amount of devices offer a wraparound strap, the rest utilize a through strap	Depends on the receptacle as the ArrowLink solution attaches a module to existing, non-modular receptacles	Leviton is the only manufacturer exclusively using wraparound straps, providing enhanced durability. *
Warranty	10-year warranty*	1-year warranty	1-year warranty	1-year warranty	An industry best warranty ensures commitment to quality and service.
Module Options	Color coded options: White (Receptacles), Yellow (Switches), Red (Emergency), Orange (Isolated Ground), solid, stranded & wago connectors	One clear connector, solid or stranded	Gray (Standard), Blue (Surge), Red (Emergency), Yellow (Custom, by request), solid or stranded	Gray, solid or stranded	Leviton has the largest offering of module options, with color-coded solid or stranded, and wago connectors

*except Lev-Lok USB Receptacles and GFCI Receptacles

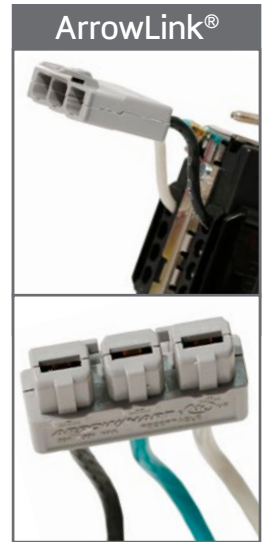

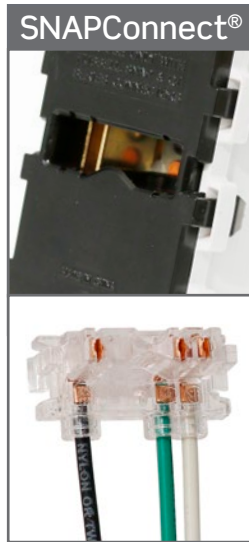

The PERFECT productivity solution for electrical construction and maintenance applications.

KEY FEATURES AND BENEFITS

- 3X faster installation than screw terminal devices
- 5X faster to swap out
- Improves quality – keyed termination prevents miswiring
- Compress project timelines – complete more projects
- Improve profitability

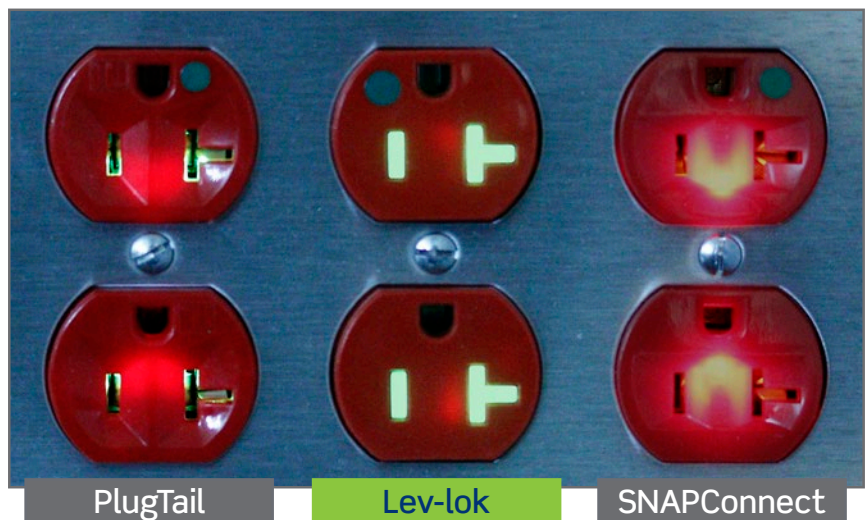

Swaps out in seconds!

The simple twist and lock mechanism that Lev-lok employs not only allows faster change-out to accommodate code updates and upgrades but provides a better overall electrical connection with more surface area contact between the wiring module and pins.

Outshines the competition!

Our distinctive green illuminated blade slots allow for easy power indication. The LEDs have been rated for 100,000 hours and are clearer and brighter than the competition.

Safety

Lev-lok GFCI Receptacles provide superior resistance to surges and over-voltages in areas that need the added safety of ground fault protection. In addition, Lev-lok GFCIs feature feed-through terminals for added downstream protection.

Energy Savings

Lev-lok is the only modular wiring device system that features occupancy sensors, a valuable aid for greener buildings and a great convenience in commercial spaces.
